

HEY, YOU!

Do you feel tired?

Start each day fresh with motivation and exercise!

Are you fit?

Get even fitter!

Do you loove both special relativity aaaand quantum theory?

See and experience them united WITH YOUR OWN HANDS!

Want to know how, when and where?

Hands-On Quantum Field Theory

Spezialvorlesung mit **Übungscharakter** (VU, 4st, Block), Sommersemester 2012,

SR 05.13, Beginn: 23.4.2012, Zeiten:

Mon: 08:00 – 09:30, Tue, Wed, Thu: 08:00 – 09:00, Fri: 08:00 – 09:45

Based on the principles of both quantum theory and special relativity we'll embark on a journey over the vast (quantum) fields of our theoretical-hadron-physics world and related topics. As with every decent fitness program, emphasis will be put on **understanding**, **proper technique**, and — last but not least — **motivation!**

To take into account individual fitness needs or goals that would also benefit the entire audience, **suggestions are welcome!**

A. Krassnigg
